

7 Reasons Why Homeowners Choose Curb Creations Decorative Concrete Edging Over Plastic, Metal, Wood, or Blocks and Pavers, and Now Say... "It's The Best Thing I Ever Did To My Yard".

1. **NOTHING else will give you the durability of concrete.** Curb Creations has customers over 25 years that we see at our home and garden shows that gladly tell of the longevity of our product. Our decorative concrete edging has a 4500 psi rating. We add a special admixture to increase strength, reduce shrinkage, and increase workability. As the concrete is being extruded, an 1/8 inch, hot-dipped, galvanized, steel cable is being run through the entire length of the concrete edging to help minimize shifting and/or separation. Control joints are scored approximately every 2 feet to allow for expansion and contraction of the product. Our concrete edging has been designed and engineered to withstand large riding mowers after the curing process has completed. That is why commercial accounts like Cargill and General Mills have chosen concrete landscape curbing by Curb Creations. Concrete will not rust, will not rot, and will maintain its shape and design year after year. That is why most of our work is replacing the black poly edging that most landscapers put in. Over time, black poly edging begins to pop up, loses the shape, and allows landscape material to spill onto the lawn.
2. **NOTHING compares to the timeless finish and clear distinction between lawn and landscape that continuous decorative concrete edging provides.** Over the years, our clients consistently express how the landscape curbing effortlessly enhances and refines their outdoor spaces, creating a polished and sophisticated appearance. The decorative landscape curbing possesses the remarkable ability to truly "transform" your yard, with before and after pictures showcasing the astounding impact. The product's design, featuring curves, contours, and overall aesthetics, is profoundly influenced by the expertise of the installing company. Achieving precise curves, flawless straight lines, a consistent flow, and an alluring yet maintenance-free depth should be the forefront considerations during installation. Just as a fine painting requires a frame to complete the artwork, landscaping similarly demands the touch of a professionally installed decorative concrete landscape edge to elevate it to a true "showplace."
3. **NOTHING grants you the flexibility to custom match the curbing with your existing pavers, brick, stone, house color, landscape rock color, mulch color, or other landscape elements like decorative concrete edging does.** Our mixing process enables us to introduce any color that complements your landscape and home seamlessly. Moreover, we have the capability to incorporate color accents, textures, and stamping techniques to impart a "natural" appearance to your concrete edging, seamlessly completing the overall landscaping and home design. Instead of serving as an out-of-place concrete barrier, the edging effortlessly integrates into the landscaping, becoming an integral part of the visual harmony.

4. **NOTHING else will allow you the satisfaction of reduced maintenance when mowing and maintaining your lawn and landscape.** Curb Creations will take the time to do the necessary ground preparation so your decorative curbing will match up to your existing lawn. In most cases you will be able to mow right on the curbing with little or no trimming. The concrete edging is designed to have a higher back side to hold your rock, mulch, or other landscape materials in place. You will not have rocks or mulch falling out on your grass. The front edge will match up to your lawn and will be installed as close to the grass as possible. There is nothing worse than having a company install the edging poorly and leave you with a large gap between your lawn and the curb. Decorative concrete edging gives you the "clean" look that homeowners strive for.
5. **Curb Creations experience, reputation, quality, and commitment to excellence.** Installing decorative concrete edging is all we do...every-day. We pride ourselves in doing the best possible job for each and every customer...period. The owners oversee every job, making sure your job is done to the standards that Curb Creations has set.
6. **Homeowners that choose decorative curbing realize they deserve the elegant look and clean lines that concrete landscape curbing provides.** They take pride in their homes and will pay for the value that concrete edging provides. Our clients have worked extremely hard to get to the position in life where they appreciate their yards and the hours they have spent making them look attractive. Decorative concrete landscape edging is a natural decision for them to make to achieve "the look" they have worked hard to attain. You deserve to have you yard look "exceptional".
7. **NOTHING will compare in value when you compare cost to longevity and factor in the added value when or if you decide to sell your home.** Landscaping is an important aspect in the value and "curb appeal" of any home. The use of concrete edging will increase that value and improve the "curb appeal" of your home. When you compare the cost of concrete edging to other borders you will be amazed by the quality and added value you receive from concrete landscape edging. Remember, this product was created to be a permanent edge, unsurpassed and unequaled by other so-called pavers, blocks, stones, plastic, or wood. The value you receive from a properly installed concrete edging is worth the cost.
